Volume 2 Issue 6

Life can best be understood by likening it to a game. Since we are exterior to a great number of games, we can regard them with a detached eye. If we were exterior to Life instead of being involved and immersed in the living of it, it would look to us much like games look to us from our present vantage point.

Despite the amount of suffering, pain, misery, sorrow and travail which can exist in life, the reason for existence is the same reason as one has to play a game—interest, contest, activity and possession. The truth of this assertion is established by an observation of the elements of games and then applying these elements to life itself. When we do this we find nothing left wanting in the panorama of life.

## ~ Editorial ~

*reservo , servo , proveho*

### Dear Reader,

Life is, indeed a game. The quality of the game is important however. One can play the game of just getting by, not being responsible for one's life or what is happening around one. Letting other take the initiative. Or one can start to take more and more responsibility oneself.

The interesting thing is that the more responsibility one assumes, the more control one has. As one's area of responsibility increases so does one's area of control and ability to be at cause over one's life. Come what may.

And how can you take more responsibility? Well one way is to gain more knowledge. More information, or data if you will. One way this can be done is with more study of the basics of Scientology. Study of what constitutes man, more study of the universe and how it operates. Such information as the basic axioms, the parts of man, the eight dynamics and host more.

All this information is there for the taking in the books of L. Ron Hubbard. Correctly understood and applied one can start to increase one's area of responsibility and control and improve one's life and happiness for oneself and others..

Not a bad prospect at all is it?

Michael Moore  
President  
International Freezone Association Inc.

### The Purposes of the International Freezone Association

*Preserve the exact technology and original workable philosophy of Lafayette Ron Hubbard for future use so it is available for all mankind.*

*Protect the exact technology and original workable philosophy of Lafayette Ron Hubbard so it is not altered, diluted or changed in anyway but remains exactly as Lafayette Ron Hubbard issued it.*

*Promote the exact technology and original workable philosophy of Lafayette Ron Hubbard so it may be known by all mankind*

<http://internationalfreezone.net>

## *The Aims of Scientology and the IFA*

*Lafayette Ron Hubbard first issued the 'Aims of Scientology' which of course still stands. Yet, despite holding a copyright on these aims the Church of Scientology, RTC and the CST do not appear to be following these aims fully. Therefore it behooves us to take some responsibility and set out our aims, based upon the aims that Ron first envisaged as something which we can honestly strive to attain.*

*We therefore stated below:*

### **The Aims of the IFA**

To contribute towards having a sane society by the promotion, expansion and application of the technology to the point where people can live their lives in peace and security and without war or insanity and where they can honestly flourish and prosper and attain higher levels of spiritual being.

The IFA is non political in nature and welcomes any individual of any creed, race or nation.

The IFA does not seek revolution. The IFA seeks only to assist in paving the way for evolution to higher states of being for the individual and for society. After endless millennia of ignorance about himself, his mind and the universe, a breakthrough has been made for man by Lafayette Ron Hubbard with the philosophy and the technology he developed to free man from the shackles of his mind.

According to Lafayette Ron Hubbard, "The combined truths of fifty thousand years of thinking men, distilled and amplified by new discoveries about man, have made for this success."

We welcome you to the IFA We would like your help in achieving our aims and helping others and we hope to be able to help you in return.

The original working technology of Lafayette Ron Hubbard is the most vital movement on Earth today. In a troubled world, the job of promoting and applying this technology is not easy. But then, if it were, we wouldn't have to be doing it.

The IFA does not owe its help not having done anything to caused it to propitiate. We are here because we want to be here and we want to assist Ron in his aims.

#### **As Ron says:**

"Man suspects all offers of help. He has often been betrayed, his confidence shattered. Too frequently he has given his trust and been betrayed. We may err, for we build a world with broken straws. But we will never betray your faith in us so long as you are one of us.

The sun never sets on Scientology.

And may a new day dawn for you, for those you love and for man.

Our aims are simple, if great.

And we will succeed, and are succeeding at each new revolution of the Earth.

Your help is acceptable to us.

Our help is yours."

'The Aims of Scientology' -- Lafayette Ron Hubbard

## CERTIFIED AUDITORS & GROUPS

**This list of auditors and groups here have been ratified and certified as delivering On Source Standard Technology.**

These Auditors and groups have requested and gone through an exacting certification process that validates their abilities and expertise. See [Certification](#) for further details. They have passed stringent testing by senior technically qualified people as per the [certification process](#). Non certified and pending auditors, groups and organizations can be found on the [auditors page](#). The IFA offers no guarantee as to the quality of delivery of services with uncertified auditors.

# The Tone Scale in Full

## The Tone Scale

Understanding is composed of Affinity, Reality and Communication. This triangle tells us that the co-existent relationship between affinity, reality and communication is such that none can be increased without a resulting increase in the other two and none can be decreased without decreasing the other two. Of the three, communication is by far the most important. Affinity and reality exist to further communication. Under the heading of affinity we have, for instance, all the varied emotions which go from apathy at 0.1 through grief, fear, anger, antagonism, boredom, enthusiasm, exhilaration and serenity in that order. It is affinity and this rising scale of the characteristics of emotion which give us the Tone Scale.

Scientology 0-8. The Book of Basics

## THE CONDITIONS OF EXISTENCE

Source: A New Slant on Life  
Copyright L. Ron Hubbard

here are three conditions of existence.

These three conditions comprise life.

They are BE, DO and HAVE.

The condition of BEING is defined as the assumption of a category of identity. It could be said to be the role in a game, and an example of beingness could be one's own name. Another example would be one's profession. Another example would be one's physical characteristics. Each or all of these things could be called one's *beingness*. Beingness is assumed by oneself or given to one's self or is attained, for example, in the playing of a game, each player having his own beingness.

The second condition of existence is DOING. By doing we mean action, function, accomplishment, the attainment of goals, the fulfilling of purpose, or any change of position in space.

The third condition is HAVINGNESS. By

havingness, we mean owning, possessing, being capable of commanding, positioning, taking charge of objects, energies or spaces. The essential definition of *having is* to be able to touch or permeate or to direct the disposition of.

The game of life demands that one assume a beingness in order to accomplish a doingness in the direction of havingness.

These three conditions are given in an order of seniority where life is concerned. The ability to *be is* more important than the ability to *do*. The ability to do is more important than the ability to *have*. In most people all three conditions are sufficiently confused that they are best understood in reverse order. When one has clarified the idea of possession or havingness, one can then proceed to clarify doingness for general activity, and when this is done one understands beingness or identity.

It is an essential to a successful existence that each of these three conditions be clarified and understood. The ability to assume or to grant beingness is probably the highest of human virtues. It is even more important to be able to permit other people to have beingness than to be able oneself to assume it.

## TWO RULES FOR HAPPY LIVING

1. *Be able to experience anything.*
2. *Cause only those things which others can experience easily.*

Man has had many golden rules. The Buddhist rule of “Do unto others as you would have these others do unto you” has been repeated often in other religions. But such Golden rules, while they served to advance man above the animal, resulted in no sure sanity, success, or happiness. Such a golden rule gives only the cause point or at best, the reflexive effect point.

This is a self-done-to-self thing, and tends to put all on obsessive cause. It gives no thought to what one does about the things done to one by others not so indoctrinated.

Copyright 1952 by L. Ron Hubbard

**Freedom**

Faced on too many barriers, man yearns to be free. But launched into total freedom he is purposeless and miserable.

There is freedom amongst the barriers. If the barriers are known and the freedoms are known, there can be life, living, happiness, a game.

## Wins & Success Stories from the Independent Scientology Freezone

**We get many success stories in the Freezone of auditing, training and, yes, even from just reading Lafayette Ron Hubbard Books!**

Here is just a small selection.

### **Drug Rehab Program**

I have completed the Drug Rehab Program. Before the program I had a strong persistent desire to consume alcohol or other drugs in order to dramatically alter my perception of life. I also had lost interest in any and all activities. I no longer feel the strong and persistent desire to take drugs and alcohol. I am looking forward to pursuing new business endeavors and hobbies. I feel relieved to be free from the thoughts that drove me to drink. My body as well as my mind feels improved and free from the effects of my previous drug and alcohol consumption. Now the thought of clouding my mind with drugs or excessive alcohol consumption detests me. Throughout the program I have made dramatic changes to my point of view and behavior. I am happy to move forward in my life and point my self toward more productive and fulfilling endeavors. I really appreciate having this opportunity to come to the Life Improvement Center for this program. Thank you all for your kindness and support. I look forward to enjoying the many lasting relationships that started here. MO

After a long hiatus off the Bridge for various reasons, I decided to give it one last chance. I

didn't have much choice. Having had a track of sessions-gone-bad due to the squirrel technology currently dished out by the official "church", I was pretty much in apathy about ever making progress. My life was spiralling down and I was pretty much just waiting for the right moment to die. After seeing the videos of Franklin and Mary Freeman from the 2010 Freezone Convention, my husband contacted them and arranged for Mary to audit the two of us. Mary was gracious enough to travel the long distance to our home since my travel is limited due to an injury I've been dealing with for the past four years. My first session with her went better than anything I'd experienced in my 24 years in the official "church". Subsequent sessions have been no less spectacular. For example, with Mary's help, I recently handled a well-entrenched service facsimile that was ruining my life – and not doing the lives of others around me any favors. My ARC for others has risen and my universe is quieting down significantly. I made the comment after my first session that everything that had occurred in the session was the exact right thing, at the exact right time, in the exact right way. I used to dread going in session because I felt like I came out of them with more charge

than I had when I went in. This is no longer the case. Mary's expert application of LRH's incredible Tech, her amazing comm cycle, and Franklin's spot-on C/Sing have given me a safe, secure environment in which to handle what I got into Scientology to handle. For the first time in a long time, I finally have hope. Mary and Frankie, I cannot thank you enough for what you've done and for what you are doing. You are among the most valuable of the valuable beings on this planet. ARC

---

I feel that my life has transformed. The biggest change has been that I am now able to bypass my fears that have held me back from life for so long. During my vacation to Orcas, my love for hiking was reborn. Since I've been back I've been trying to get out every day, and I've discovered new trails. I'm having a great time and feel very enthusiastic about my future. This is my spirit, and it's coming alive again. I love it! Thank you so much for helping me get here, to my authentic self again. MD

---

Chaplain cycle with Frankie 3/11 Two testimonials from the two individuals:

I see a defensive pattern in myself, which I realize is ineffective and negatively charged. It is an habitual and relentless justification of my shortcomings. I found a particular relief in the absence of these behaviors throughout Frankie's processes and direction. I also observed a surprising degree of peacefulness come over both E and myself as I became very capable of accepting accountability for my dishonesty/overts and withholds, in regard to my adored fiancée. Thank you. CC

---

It was a pleasure meeting and working with Frankie. It was magical to witness his ability of the "power of clearing..." via allowing a space of few words and total intention. He held a space for clear communication and love to prevail. We are blessed to have met and worked with such a miraculous spirit. All our love, EH

### **Objectives Co-Audit**

Today I completed co-auditing the Objectives. I am excited to have finished and had some great wins in the process. Among other things I gained an improved ability to control myself especially in relation to communication. I found myself often feeling light hearted and happy during and after the sessions. This was my first time auditing anyone. Being an auditor was fun and rewarding. I am really glad that I was able to co-audit the Objectives. I liked hearing the wins and cognitions that my PC got throughout the process. I could see how meaningful her wins were through the excited and happy expressions on her face. It felt great to be a part of someone else feeling so good and having such big wins. I look forward to doing more auditing in the future. MO

I have done the objectives before and didn't expect to get much more out of them. I ended up having a lot more wins and fun than I thought I was going to. I really enjoyed being able to be the auditor and the preclear. I feel like a lot of what I got out of the objectives is common sense, but I guess over time you kind of lose a lot of your common sense. The objectives really helped put me in present time and showed me the common sense that I had

## ~ Special Notice ~

To see the IFA on Facebook, go to [Int Freezone Assoc](#)

**Keep in Touch Today!**

forgotten or have been ignoring for quite a while. I also really enjoyed my "twin"--auditor and preclear. He helped me out with the objectives and made them fun. KD

After 16 years in the organized Church of Scientology, plus 200 hours of auditing, and being stuck for a good 5-8 years, I'm finally moving up the Bridge. In less than half an intensive, I've repaired my past auditing, spotted a major SP that was on my lines for a VERY long time, found out I was Clear, attested to Clear, and started Grade 0 with some awesome wins right off the bat. The Auditor and C/S will actually allow me to run my case on the level I need to. They are very good at paralleling the PC. I am now moving forward and up. Not going back to repeat actions I've done years ago. I am in control of my future, the C/S or Upper Man-

agement is NOT. RE

### **The State of Clear**

It's definitely a lot of stuff to swallow (grasp) in such a short amount of time. But, the feeling of serenity, and certainty, is indescribable. It just feels great to know that that case is NOT there. RE

### **Grade II**

I had countless cognitions doing Grade II. I am free from the hostilities and sufferings of life. I alone am responsible for my condition in life. I am at cause of my life. My self-actualization is real to me! A

~oo00oo~

## **You Only Live Once Or do you?**

*It is only in the modern 'western' world that the concept one only lives once is prevalent.*

*In the east for thousands of years it has been quite normal to understand and expect to live many lifetimes. The Buddhist and Tibetan and many other religions and philosophies of the east have always maintained the concept that one is an immortal being and not tied down to the "one life only that's ya lot mate" type of thinking.*

*Of course one could say it is just theory, which is why perhaps, Ron Hubbard set out to establish the truth and discover by an independent means if man had lived before this life.*

*The result was the book, "Have You Lived Before This Life and here is a fair use quote extracted to demonstrate how this was done.*

"I began search into the back track of Mankind

some years ago. There was no actual knowledge of it in existence. There were numberless superstitions, countless guesses, as many theories in favour of one thing as in favour of another. People believed, some of them, that Man had lived before. They had no proof. Others believed that Man was born innocent and died and went to a place called Hell.

Most believed that when you had lived once, that was all, fellow. Such a number of conflicting theories must have truth in them. It became my business to discover, against considerable odds, that truth. In the first place, there was something wrong with Man. An animal such as a cat, even a reptile, a lizard, had habit patterns which carried him through his early days. Not Man. Why not? As usual, a lot of vagueness answered this. The very schools of 'thought' that said Man was just another animal bogged utterly on why it was that babies, the young of this very intelligent animal, are much more stupid than kittens. That was only one thing wrong with Man that wasn't explained.

The further one investigated, the more one came to understand that here, in this creature Homo Sapiens, were entirely too many unknowns. People who suddenly, out of no observable training, begin to speak foreign tongues, men who 'seem to remember having been here before,' strange yearnings in people for various parts of the country or the world or the stars of which they have no actual knowledge, such things are routine puzzles.

And there was a much more important thing at work than mere curiosity. Now and then, in my auditing, I would discover a case which would be extremely reluctant to recover and then would recover only partially so long as I used data from the current lifetime of the preclear; but as soon as I used the whole span of the time track- about sixty trillion years-I could obtain immediate response. One must be very impartial, even brutal, in investigation. The last series of cases I audited, twenty in number, chosen at random from various life strata and suffering from mental and physical ills which were extremely varied, were audited to demonstrate finally to myself one thing only-Can an auditor obtain a swift recovery by auditing the current lifetime only? I used the most modern of techniques- 1952-and did a standard auditing address to the current lifetime of each one.

I obtained mediocre results, partial recoveries, slight betterment in attitude. Then I audited each case addressing only past track, prior to this lifetime: the results were swift and spectacular. Thus I validated, for myself, the reality that in auditing the whole track, one can obtain excellent results, that in auditing the current lifetime, one can obtain slow and mediocre results."

*History has proved Ron Hubbard entirely correct. Since then, many thousands of people have received auditing not confined to the events they have experienced in their current life and all to remarkable relief for it follows then, that if one has had experiences in this time, then one would have had experiences in prior live times and one's recovery of these can only be accomplished by the acknowledgment and confront of those incidents.*

*The road is open now to the mysteries of the universe and man and the alleviation of those factors that beset man and hold him back from his true spiritual attainment.*

~oo00oo~

## ~~ Lafayette Ron Hubbard Quote ~~

*The hardest task one can have is to continue to love one's fellows despite all reasons he should not.*

*And the true sign of sanity and greatness is to so continue.*

*For the one who can achieve this, there is abundant hope. For those who cannot, there is only sorrow, hatred and despair, and these are not the things of which greatness or sanity or happiness are made.*

*A primary trap is to succumb to invitations to hate. There are those who appoint one their executioners. Sometimes for the sake of the safety of others, it is necessary to act, but it is not necessary also to hate them.*

*To do one's task without becoming furious at others who seek to prevent one is a mark of greatness—and sanity. And only then can one be happy.*

### WHAT IS GREATNESS

## Scientologists Glossary

**Here is an extensive list of words and terms found in the applied philosophy of Lafayette Ron Hubbard. This is useful for anyone making a study of Dianetics and Scientology.**

### **A=A=A**

Anything equals anything equals anything. This is the way the Reactive Mind thinks, irrationally identifying thoughts, people, objects, experiences, statements, etc., with one another where little or no similarity actually exists. Example: Mr. X looks at a horse, knows it's a house, knows it's a school teacher, so when he sees a horse he is respectful. This is the behavior of the Reactive Mind. Everything is identified with everything on a certain subject.

### **Aberration:**

is a departure from rational thought or behavior. From the Latin, "aberrare", to wander from, Latin "ab", away, "errare", to wander. It means basically to err, to make mistakes, or more specifically to have fixed ideas which are not true. The word is also used in its scientific sense. It means departure from a straight line. If a line should go from A to B, then if it is "aberrated", would go from A to some other point, to some other point, to some other point, to some other point, to some other point, and finally arrive at B. Taken in its scientific sense, it would also mean the lack of straightness or to see crookedly.

### **Admin:**

(in auditing) is used about the action or fact of keeping auditor's reports, summary reports, worksheets and other records related to an auditing session. "He kept good "admin"" meaning that his summary report, auditor's report and worksheets were neat, exactly on pattern, in proper sequence and easily understood, as well as complete.

### **Affinity:**

Degree of liking or affection or lack of it. Affinity is a tolerance of distance. A great affinity makes you feel 'close' to somebody or something. It's a tolerance of or liking of closeness or close proximity. A lack of affinity would be an intolerance of or dislike of closeness. Affinity is one of the components of understanding, the other components are reality and communication. One's level of affinity is expressed on the so-called tone scale.

### **Ally:**

is a person from whom sympathy came when the PC was ill or injured. An ally coming to the PC's defense of his words or actions aligns with the individual's survival. The Reactive Mind of the PC gives that ally the status of always being right--especially if this ally-relationship originally is coming from a highly painful Engram. The ally is seen as a person that has to be blindly followed or supported as 'he can do no wrong'.

### **Alter-is:**

To change or falsify the way something actually is.

### **Analytical:**

means capable of resolving, such as problems and situations. The 'Analytical' mind would be the conscious aware mind which thinks, observes data, remembers it and resolves problems. It would be essentially the conscious mind as opposed to the unconscious mind. In Ability Clearing the Analytical mind is the one which is alert and aware and the Reactive Mind simply reacts without Analysis.

The word "analytical" is from the Greek, "analysis", meaning resolve, undo, loosen, which is to say take something to pieces to see what it is made of. This is one of those examples of the shortcomings of the English language since no dictionary gives the word "analytical" any connection with thinking, reasoning, perceiving, which in essence is what it would have to mean, even in English.

### **ARC:**

A word made from the initial letters of Affinity, Reality and Communication which together equals understanding. ARC is pronounced as three letters A-R-C.

### **ARC Break:**

1) A sudden drop or cutting of one's affinity, reality, or communication with someone or something. It is pronounced by its letters "A-R-C break".

2) A sudden drop or cutting of one's affinity, reality or communication with someone or something. This is in common language known as an upset or a condition of being shocked, disappointed, surprised, offended, etc. The A-R-C break gives an inside look in the anatomy of what is going on.

**ARC break Assessment:**

Reading a prepared auditing list which applies to the activity. The list is read to the PC while on a Meter. In the ARC Break Assessment the auditor only locates and then indicates the charge found to the PC. It is used on very upset PCs where actual auditing is not possible. If auditing is possible you can do Auditing by Lists. The same list can be used but here you actually run a process to handle each read to F/N VGIs.

**ARCU CDEINR:**

Stands for affinity, reality, communication, understanding. And curious, desired, enforced, inhibited, no, and refused. These are the points assessed by an auditor on the Meter when handling an ARC break. First he assesses ARCU, finds the most charged one and indicates it to the PC. Then he assesses CDEINR, finds the most charged one and indicates it to the PC. Example: The first Assessment finds 'Reality'. This is indicated. The second assessment could end up with "Inhibited Reality". This is indicated to the PC who will feel relief.

**As-is:/As-is-ing:**

To view anything exactly as it is, without any distortions or lies, at which moment it will be fully understood. When a problem is As-is-ed it will vanish and cease to exist as a problem.

**Assess:**

means to choose, from a list of statements - which item or thing has the biggest read on the Meter. The longest read usually will also have the PCs interest.

**Assessment:**

is done by the auditor between the PCs Bank and the Meter. There is no need in assessing to look at the PC. Just note which item has the longest fall or Blowdown. The auditor looks at the Meter while doing an Assessment. Also the action of an auditor reading down a list to find out which item on the list reacts more than the other items on the list, using a Meter, and so choose which item to handle. (See also, Prepared Lists).

**Assist:**

A simple auditing action given as a first aid. Does not replace medical first aid. An action undertaken by an auditor to assist the spirit to confront physical difficulties.

**Attention:**

When interest becomes fixed, we have attention; it's directed or held interest. Attention is aberrated by becoming unfixed and sweeping at random, or becoming too fixed without sweeping.

**Attention unit:**

Could be considered a theta energy unit of awareness existing in the mind in varying numbers from person to person. This would be the theta endowment of the individual; attention units are what he enjoys with, thinks with and works with. Attention units can be caught up in incidents on the Time Track and be locked up in these incidents, problems, etc. A person who is 'not there' mentally has most of his attention units locked up. Auditing enables the PC to regain them as free attention. See also theta.

**Auditing:**

Also called Processing, the application of Ability Clearing processes and procedures to a person by a trained auditor. The exact definition of auditing is: the action of asking a PC a question (which he can understand and answer), getting an answer to that question and acknowledging him for that answer.

**Auditing Session:**

A period in which an auditor and PC are in a quiet place where they will not be disturbed. The auditor gives the PC certain and exact commands which the PC can follow.

**Auditor:**

A person trained and qualified in applying Ability Clearing processes and procedures to individuals for their betterment; called an auditor because auditor means "one who listens."

**Auditors Code:**

The technical or professional code of Ability Clearing auditors; a list of "do's" and "don'ts". The rules are based on experience and have proven themselves to be necessary to ensure optimum progress in auditing a case; the governing set of rules for the general activity of auditing.

2) Important set of rules, which guides the auditor's professional behavior and attitude. The purpose of these rules is to develop maximum trust between auditor and PC. Maximum trust leads to quickest and most lasting results.

It's a joy to be audited by an auditor, who sticks to this code rigorously all the time. Remember the important rule: Auditor plus PC is greater than PC's Bank (aud. + PC > Bank).

**Auditors C/S:**

A sheet on which the auditor suggests the case supervision instructions for the next session. It has to be approved by the C/S before being carried out.

**Auditors Report Form (ARF):** This shows in summary form what actions were taken in session and how they went. The ARF is made out at the end of each session and is an outline of what happened during the session. (Abbreviation: ARF).

**Bad indicators: (BIs):**

Those observable indications on the PC and Meter that things are not going well for a PC.

**Bank:**

Reactive Bank; Reactive Mind; Engram Bank.

The mental image picture collection of the PC. It comes from computer technology where all data are in a "Bank"; portion of the mind which contains Engrams, Secondaries and Locks.

**Blow:**

1) Something that suddenly disappears (such as a problem or charge in general) is said to have blown.

2) To depart without authorization from an area. To leave suddenly without explanation. It can be used as a noun and as a verb.

**Bullbaiting:**

In coaching certain drills the coach attempts to distract the student auditor by doing Bullbaiting. This should be done by play acting situations that could occur in session, but other things can be used from time to time. As a bull-fighter attempts to attract the bull's attention and control the bull, so does the coach attempt to attract and control the student auditor's attention; however the coach flunks the student auditor whenever he succeeds in distracting the student from the drill and then repeats the action until it no longer has any effect on the student (see also Buttons).

**By-passed Charge: (BPC):**

1. Mental energy or mass that has been restimulated in some way in an individual, and that is either in part or wholly unknown to that individual and so is capable of affecting him negatively.

2. reactive charge that has been by-passed (restimulated but overlooked by both PC and auditor). When found and indicated the PC will experience relief. On a Meter you would see a Blowdown.

**Case:**

The sum of aberrated conduct or behavior resulting from the influences of the Reactive Mind.

When a practitioner is displaying 'case' they are acting in an irrational and also unprofessional manner.

**Case gain:**

The improvements and resurgences a person experiences from auditing and training; any case betterment according to the PC.

**Case Supervision: (C/S):**

The inspection of auditing, by a qualified Case Supervisor (using auditor reports, session worksheets and Examiner reports); the ordering of standard actions and remedies to ensure maximum gains for the PC. The written instruc-

tions of a case supervisor.

**Chain:**

A series of incidents of similar nature or similar subject matter. When running a Chain the PC is sent earlier and earlier until it the Chain fully handled.

Chain of incidents: A whole adventure or activity of many incidents, related to each other by the same subject, general location or people. It can go way back in time.

**Charge:**

1. harmful energy or force accumulated and stored within the reactive mind. It's attention units trapped in past conflicts and unpleasant and painful experiences, etc. Auditing discharges this charge so the energy is no longer trapped nor there to affect the individual negatively. 2. *emotional* charge or energy.

3. by charge is meant anger, fear, grief, or apathy contained as misemotion in the case.

**Check-out:**

The action of verifying a student's knowledge of an item given on a check sheet. This is much like a verbal examination in school. But special attention is given to definitions of words and the student's ability to demonstrate principles with a demo kit.

**Check sheet:**

A Check sheet is a printed form that sets out the items to be studied or done by a student, item by item, on a course. It lists all the materials and drills of the course in the order in which they are to be studied.

**Clay Demo:**

Clay Demonstration. Making an illustration of the principles studied in model clay. The student demonstrates definitions, principles, etc. in clay to obtain greater understanding by translating significance into actual mass.

**Clear:**

1) A person (thetan) who can be at cause knowingly and at will over mental matter, energy, space and time as regards the first dynamic (survival for self). The state of Clear is above the release Grades (Grade 0-4) of Ability Clearing (all of which has to be done before you get to Clear).

2) A Being, who no longer has his own Reactive Mind.

**Clearing:**

Various techniques directed at improving abilities and awareness leading to the state of Clear. The activity done in auditing.

Coach: The person who helps another student understand or apply a particular text or drill. He is a one-on-one instructor. Usually students take turns being coach and student.

In Drilling: The one, that *directs the student*. She is the instructor of the drill, the one that calls the shots. The term 'coach' is best known from sports; he instructs the players and shows them what to do. During a game he gives the players practical advice from the sideline. 'Coach' is also used about a private instructor teaching a student.

**Coaching:**

Training intensively by instruction, demonstration and practice. In training drills, one twin is made the coach and the other the student. The coach helps the student to achieve the purpose of the drill. He coaches with reality and intention following the materials pertaining to the drill to get the student through it. When this is achieved the roles are reversed--the student becomes the coach and the coach becomes the student.

**Co-auditing:**

An abbreviation for co-operative auditing. It means a team of two people who are using Ability Clearing processes to help each other reach a better life. Sometimes three or more people make up a class of co-auditors who audit each other.

**Cognition: (cog):**

A PC origination indicating he has "come to realize." It's a "What do you know? I . . ." statement. A new realization of life. It results in a higher degree of awareness and consequently a greater ability to succeed with one's en-

deavors in life.

**Communication Lag or Comm lag):**

The time that passes between a question and an actual answer. It can be hesitation or reflection, but it can also be not answering the question by talking about something that isn't an answer. In study comm lag in a check-out is flunked. It shows the student doesn't know the materials 100%. In auditing comm lag is just an indicator. A long comm lag means there is aberration in the area.

**Communication (Comm):**

1) The interchange of ideas or objects between two people or terminals. More precisely the definition of communication is the consideration and action of impelling an impulse or particle from source point across a distance to receipt point, with the intention of bringing into being at the receipt point a duplication of that which emanated from the source

point. The formula of communication is: cause, distance, effect, with intention, attention, duplication and understanding. Communication by definition does not need to be two-way. Communication is one of the component parts of understanding.

2) The exchange or interchange of ideas or objects between two people or designated locations (terminals). More precisely the definition of communication is the consideration and action of impelling an impulse or particle from source point across a distance to receipt point, with the intention of bringing into being at the receipt point a duplication and understanding of that which emanated from the source point.

**Communication, Control, Havingness Processes:**

or CCHs. Processes which bring a person into better control of his body and surroundings, put him into better communication with his surroundings and other people, and increase his ability to have things for himself. They bring him into the present, away from his past problems.

**Communication cycle: (comm cycle):**

A completed communication, including origination of the communication, receipt of the communication, and answer or acknowledgement of the communication.

**Computation:**

technically is that aberrated evaluation and postulate that one must be consistently in a certain state in order to succeed.

**Confront:**

To face without flinching or avoiding. Confronting is actually the ability to be there comfortably and perceive.

**Control:**

The ability to start, change and stop things at one's own choice.

**CT: Clearing Technology:** Consists of Ability Clearing (the Grades) and Engram Clearing (Level 5). In this handbook we mainly use "Ability Clearing" to describe the whole subject.

**Destimulation:**

The action of deleting the moments of restimulation of the Reactive Mind or some portion of it, so that it moves away from the PC and he is no longer connected to it.

D of P Interview: (Director of Processing Interview): An interview of a PC by a D of P or available person. It is usually done on a Meter. The purpose is to get data for programming and C/Sing a case. It is not auditing.

**Dramatization: (Dramatize):**

To repeat in action what has happened to one in experience. It's a replay out of its time period now of something that happened then. The person is going through the motions of some incident as if he was an actor, but he does the re-enacting unknowingly.

**Earlier Similar: (E/S):**

When the auditor is checking the rudiments, he may run into the situation, that the difficulty doesn't resolve right

away. To resolve the situation he will have the PC look for an earlier similar incident.

*Earlier*, means it happened before or further back in time, than the incident they were just talking about.

*Similar*, means it was somewhat the same type of incident. Maybe having to do with the same person or persons, the same place or the same surrounding circumstances. To ask for an *earlier similar incident* is used in many processes, as the reason the present incident does not resolve is because it unknowingly reminds the PC about earlier times. When he is sent earlier and the exact circumstances get known to him the subject matter will clear up.

**EP:**

End Phenomena Those indicators in the PC and Meter which show that a Chain or process is ended. In Engram running It shows that basic on that Chain and flow has been erased.

**Engram:**

is a mental image picture of an experience containing pain, unconsciousness, and a real or fancied threat to survival. It is a recording in the Reactive Mind of something which actually happened to an individual in the past and which contained pain and unconsciousness, both of which are recorded in the mental image picture called an Engram. It must, by definition, have impact or injury as part of its content. These Engrams are a complete recording, down to the last accurate detail, of every perception present in a moment of partial or full unconsciousness.

**Engram Clearing:**

This is Ability Clearing Grade 5 - Engram Clearing. It uses Engram running by Chains, Routine-3-RA as its main process. It routinely lead to the state of Clear. There are other processes that will take the PC to the state of Clear in the case this doesn't happen. But they will have to be done under the guidance of a professional auditor/ case supervisor. Engram Running: Techniques used to run Engrams with. Also the activity of applying these techniques to a PC. Today the principal process used is R-3-RA.

**Engram Running, 1950 Style:**

Auditing out Locks, Secondaries and Engrams by using the original techniques of 1950.E/S, see Earlier Similar

**Evaluate:**

To judge and determine the meaning, correctness, value, and consequence of a datum (verb).

**Evaluation:**

1) Evaluation:

The act of evaluating. The result of something being evaluated (noun). A student has to evaluate the data studied. On the other hand he should not try to evaluate for somebody else. Each student should arrive to a result based on their own efforts. Only in this way will anybody achieve sufficient certainty.

2) In auditing: Telling a PC "what's wrong with him or why he is the way he is is incorrect. In auditing the auditor guides the PC to find explanations and solutions for himself. It is against the Auditors Code to evaluate for a PC in session. When a person is allowed to do his own evaluations he achieves greater certainty.

3) Any attempt by someone to impose his data or knowledge upon another. An example would be someone telling another why he is the way he is instead of permitting or guiding him to discover it for himself.

**Flat:**

No longer producing change or a reaction. Or, in Engram running, referring to an Engram, erased.

**Flatten:**

To continue to do (something) until it no longer produces a reaction.

Flatten a process: To continue a process as long as it produces change and no longer. In Engram running it is to continue running a Chain of incidents until basic on that Chain is reached and erased. With CCHs, it is three commands getting equal comm lag response with the PC doing the process.

**Floating Needle:** or F/N.

1. A floating needle is a certain needle behavior on a Meter. It is a harmonic motion sweep of the needle over the dial at a slow, even pace. A valid floating needle is always accompanied by very good indicators in the PC.

2) The idle uninfluenced movement of the needle on the Meter dial without any pattern or reactions in it. It can be as small as 1-inch or as large as dial wide. It does not fall or drop to the right of the dial. It moves to the left at the same speed as it moves to the right. It is usually observed on a Meter calibrated with the Tone Arm between 2.0 and 3.0 with good indicators in on the PC. It can occur after a cognition, Blowdown of the Tone Arm, or just moves into floating. The PC may or may not voice the cognition.

**Floating TA:**

The PC is so released the needle can't be gotten onto the dial. The needle is swinging wider than the Meter dial both ways from center and appears to lay first on one side and then the other. The Tone Arm can't be moved fast enough to keep the extreme floating needle on the dial.

**Flow:**

A stream of energy between two points. An impulse or direction of energy particles or thought or objects between terminals. In processing the auditor works with four main flows:

*FLOW 1:* something happening to self. Another doing something to you, *FLOW 2:* doing something to another. You doing something to another., *FLOW 3:* others doing things to others. You see it happen as a spectator, *FLOW 0:* self doing something to self. You do something to yourself.

**Flunk:**

1) To make a mistake. Fail to apply the materials learned. Opposite of pass. Also used by coaches as a command: "Flunk!", to tell the student a mistake was made.

**Fly a Rud:** Fly a rudiment:

The auditor must get a free needle (floating needle) on one of the rudiment questions (ARC breaks, PTPs, Missed Withholds.) This is done to get a PC ready to run a Major Action.

**Folder:**

A folder sheet of cardboard which holds all the session reports and other items related to one PCs auditing. The folder is A4 or Legal size file folder made of light cardboard.

**Folder Summary:**

Sheets located inside the front cover of a PC folder giving an adequate summary of actions taken on a PC in consecutive order. It gives the content of the PC folder. The auditing history session by session, if you will.

**Good indicators:**

(GIs): Those observable indications that all is going well for a PC. The PC is bright, happy and winning. PC smiling and happy.

**Grade Chart:**

This chart shows all the levels of Clearing Technology auditing and training. It is the map of the road to Clear.

**Grade:**

A series of processes culminating in an exact ability attained, examined, and attested to by the PC.

**Gradient:**

Something that starts out simple and gets more and more complex. The essence of a gradient is just being able to

do a little bit more and a little bit more and a little bit more until you finally make the Grade.

**Grinding** (Grinding out):

Going over and over and over a Lock, Secondary or Engram without obtaining an actual erasure. The sense of the word comes from the action of using an emery wheel on a hard substance with it not getting much smaller or thinner no matter how long it is done. It specifically applies to Engram running. It's a bad indicator.

**Handwriting Drill:**

If the C/S can't read the worksheets due to bad handwriting or lack of data he sends the folder back to the auditor for clarification. The auditor should overprint unreadable words with a red pen. The C/S sees to that his auditors catch up on writing understandable reports the first time and can have them train in handwriting drills to catch up on speed and clarity. The auditor should not have to spend a lot of time after session clarifying worksheets. He simply have to drill to write fast and readable, keep to essentials and quickly clarify worksheets after session. He may have to work on his handwriting letter for letter to make it easier to read.

**Havingness:**

The concept of being able to reach. Owning, possessing, experiencing. Affinity, reality, communication with the environment.

**In:**

Things which should be there and are or should be done and are, are said to be "in," i.e., "We got scheduling in."

**Incident:**

The recording of an experience, simple or complex, related by the same subject, location or people understood to take place in a short or finite time period such as minutes or hours or days.

**In-session:**

Interested in own case and willing to talk to auditor.

Interest: is absorbed attention and a desire to talk about it.

**Invalidation:**

Means a degrading, 'trashing', ridiculing, discrediting or denying something someone else considers to be a fact or of value.

**Is-ness:**

Something that is persisting on a continuum.

**Item:**

Any one of a list of things, people, ideas, significances, purposes, etc., given by a PC to an auditor while listing; any separate thing or article; in particular, one placed on a list by a PC.

**Itsa:**

A term made from "It is a"; a term for a PC's action of answering an auditor's question in which the PC positively identifies something with certainty.

**Itsa-maker line:**

Communication line from the PC to his own Bank. The PC is inspecting his Bank and is somewhat introverted. It's the most important part of the auditing comm cycle as the PC is confronting his Bank and finding answers.

**Key in:**

Is a moment where an earlier upset or earlier incident has been restimulated and affect PC in a negative way. The action of recording a Lock on a Secondary or Engram; the moment an earlier upset or earlier incident has been restimulated.

**Key out:**

The action of a reactive incident (or many related incidents) dropping away without the mental image pictures being erased. The picture is still there but now far away. The PC feels released or separate from his Reactive Mind or some portion of it. An action of an Engram or Secondary dropping away without being erased. Released or separate from one's Reactive Mind or some portion of it.

**Know-to-Mystery Scale:**

The scale of affinity from Knowingness, down through Lookingness, Emotingness, Effortingness, Thinkingness, Symbolizingness, Eatingness, Sexingness, and so through to Not-knowingness to Mystery.

**L1C:** Repair List used by auditors in session when an upset occurs, or as ordered by C/S. It handles ARC Broken, Sad, hopeless or nattery PCs. Questions can be prefaced with "Recently", "In this life", "On the Whole Track", or used without. It is not to be used to handle high or low TA.

**L4 Short:** (L4): This is a short version of list correction. It contains all the most common errors. It is valid on listing in progress or recently done. If it doesn't resolve the difficulties a full L4BRB can be used (see below).

**List:** As part of auditing procedure:

Items given by a PC and written down by the auditor. Prepared List: A printed form with questions used for assessment on a PC.

**Listing:**

A special Ability Clearing procedure used in some processes where the auditor writes down items said by the PC in response to a question by the auditor, in the exact sequence that they are given to him by the PC.

Listing and Nulling: (

**L & N):**

An Ability Clearing procedure in auditing done according to very exact rules as given in the Laws of Listing and Nulling. This is taught on Ability Clearing-3.

**Locational processing:**

1) Processing which establishes confront and communication with the environment. It brings the person into present time; he becomes more alert and responsive. It can be run on one PC or on a whole class of students at the same time with benefit. 2) Processing which establishes a stability in the environment of the PC on the subject of objects and people. It can be run in busy thoroughfares, parks, confused traffic or anywhere that there is or is not motion of objects and people. It is used in the auditing room itself to orient the PC.

**Major Action:**

any auditing action designed to change a case or general considerations or handle continual illness or improve ability. This means a process or even a series of processes like four flows. It doesn't mean a Grade. It is any process the case hasn't had.

**Mental mass:**

is contained in mental image pictures.

1) Mocking up matter, energy, space and time. Its proportionate weight would be terribly slight compared to the real object which the person is mocking up a picture of.

2) Mental matter, energy, space and time. It exists in the mind and has physical existence, that can be measured by a Meter. Its proportionate weight would be terribly slight compared to the real object which the person is making a picture of. The Meter registers mental mass; changes of the position of the needle indicates changes of the mass in PCs mind.

**Mental image pictures: (MIP):**

Mental pictures; facsimiles: a copy of one's perceptions of the physical universe of some time or incident in the past. It can also be mock-ups, meaning produced by the thetan with his imagination and not a copy of an actual incident.

**Mental pictures:**

Facsimiles and mock-ups; usually a copy of one's perceptions of the physical universe sometime in the past.

**MEST:**

Word coined from the initial letters of Matter, Energy, Space and Time; the physical universe and its component parts; also used as an adjective in the same sense to mean physical, as in "MEST universe," meaning "physical universe."

**Method 3:** (M3 Assessment):

An Assessment in which each reading question is taken up and handled with the PC when it is seen to read and before continuing the Assessment.

**Method 5:** (M5 Assessment):

Assessing a prepared list once through marking the length and Blowdown of all reads as they occur when the questions are asked of the PC. Those questions which read are then handled one at a time in order from the largest read to the smallest.

**Mind:**

A control system between the thetan and the physical universe. It is not the brain. The mind is the accumulated recordings of thoughts, conclusions, decisions, observations and perceptions of a thetan throughout his entire existence. The thetan can and does use the mind in handling life and the physical universe.

**Misemotion:**

Anything that is unpleasant emotion such as antagonism, anger, fear, grief, apathy or a death feeling; mis-aligned emotion, irrational or inappropriate emotion. Misemotion is also emotion which has been suppressed and which remains part of the individual's Locks and Secondaries unless he is audited.

**Missed Withhold:** (M/W/H):

A Withhold, which has been *restimulated* by another but not disclosed. This is a Withhold which another person *nearly* found out about, leaving the person with the Withhold in a state of wondering whether her hidden deed is known or not. The *Missed Withhold* is different from the Withhold as the PC's main worry is, if the other person found out or not. The action of the other to *nearly* find out or *maybe* he found out or guessed it is why it's called a *Missed Withhold*.

**Mock-up:**

Any "knowingly created" mental picture that is not part of a Time Track; can be used as noun: "It's a mock-up" or a verb: "to mock-up something".

**Model Session:**

The same exact pattern and script with which Ability Clearings sessions are begun and ended.

**Motivator:**

Actions which were directed against the PC by others or another, used by him to justify (used as a "motive" for) Overts; an aggressive or destructive act received by the person.

**Not-is, Not-is-ness, Not-is-ing:**

The effort to reduce an unwanted condition of existence by force. It can cause the person 'to forget about it' or make a thing look smaller, but does not handle the underlying difficulty. See also As-is

**Null:**

- 1) To nullify or to reduce the value or effect of something to nothing.
- 2) means there was no reaction of the needle on the needle dial of the Meter when the auditor had asked a question of the PC; or simply it didn't read.

**Nulling:**

The auditor's action in saying items from a list to a PC and noting the reaction of the PC's Bank on a Meter.

- 2) In Listing & Nulling: The auditor reads back the list of items the PC just gave him in order to find only one item

that is still reading. This is done under the Laws of L&N.

**Objective Processes:**

Ability Clearing Level 1 processes which familiarize a person with his environment, the physical universe. Objective processes increase a PC's control, communication, and havingness on the environment.

**Obnosis:**

A word put together from the phrase, "observing the obvious."

**Op Pro by Dup:**

Opening procedure by duplication. A process which increases the PC's ability to duplicate and so increases his ability to communicate. A type of objective process.

**Origination:** In auditing:

A remark or statement from the PC, that concerns his ideas, reactions or difficulties. It is something he says, that is important to him, but isn't an answer to the auditor's question. It usually comes unexpectedly. It is different from a comment, that is defined as an attempt to distract auditor or an attempt to blow session. An auditor is trained in handling originations on TR-4.

**Out:**

Things which should be there and aren't or should be done or aren't are said to be "out," i.e., "Enrolment books are out."

**Overrun:**

- 1) Continuing to run an auditing action (in error) past the PC's attainment of its end phenomena. A person can also be overrun on things in life outside of auditing. This is doing something too long that has Engrams connected with it. As a result Engram Chains are being restimulated by life or auditing.
- 2) Accumulating protests and upsets about something until it is just a mass of stops.

**Overt:**

- 1) Overt act; an Overt is an aggressive or destructive act by the individual against one or more of the eight dynamics (self, family, group, mankind, animals or plants, mest, life or the infinite).
- 2) A harmful act. A bad deed. An Overt act is an act of omission or commission which does the least good for the least number of dynamics or the most harm to the greatest number of dynamics.
- 3) An aggressive or destructive act by the individual against one or more of the eight dynamics
- 4) That thing which you have done to others, but you aren't willing to have happen to yourself.

**Overt-Motivator Sequence:** or O/M: Overt Motivator):

- 1) The reactive series of events in which someone who has committed an Overt "has to" claim the existence of motivators (acts by others against self). Motivators are thus used to justify Overts and tend to be used to justify further Overts.
- 2) A chain of events of 'pay-back' or revenge that gets worse and worse.
- 3) See preclear.

**Postulate:**

A conclusion, decision or resolution made by the individual himself; to conclude, decide or resolve a problem or to make a plan or set a pattern for the future or to nullify a pattern of the past (like in New Years resolutions). We mean, by postulate, a self-created truth. A postulate is, of course, that thing which the individual uses to start a directed desire or order, or inhibition, or enforcement; it is in the form of an idea. Postulate means to cause a thinkingness or consideration.

**Preclear: (PC):**

From pre-Clear, a person not yet Clear; generally a person being audited, who is thus on the Road to Clear; a person who, through Ability Clearing processing, is finding out more about himself and life.

**PC Information Sheet:**

A form done with new PCs, or PCs who haven't been audited for some time (years). Doing the Form with a PC gives certain basic data that is necessary for the Case Supervisor. It is done by an auditor in session.

**Prepared List:**

The auditor, trained in using a Meter, can use prepared (printed) lists to find the specific problem or difficulty he needs to address to get the PC out of an unpleasant or puzzling situation in session. The list will contain all the possible difficulties for that action and the Meter will tell the auditor which ones to take up. A prepared list may turn up one thing or many things, that should be tackled before the routine process should be taken up again. Prepared lists can also be used to address a troubling area of PCs life and 'clean it up'.

**Prep-check:**

An auditing action in which a subject found to be charged is discharged by the use of a prepared list of buttons (called the Prep-check Buttons). Buttons such as 'Suppressed', 'Invalidated', 'Didn't Reveal', etc. are used to find charge and reactivity connected with the subject being prep-checked. There are 20 Prep-check buttons on the list.

**Present Time Problem: (PTP):**

A specific problem that exists in the physical universe now, on which a person has his attention fixed. This can be practical matters he feels he ought to do something about right away. Any set of circumstances that occupies the PCs attention, so he feels he should *do* something about it instead of being audited.

**Problem:**

Anything which has opposing sides of equal force; especially postulate-counter-postulate, intention-counter-intention or idea-counter-idea; an intention-counter-intention that worries the PC.

**Process:**

A specific technique used in auditing (processing). There are many processes. They consist of carefully worded questions and commands. They are used by an auditor in a formal session to help his PC.

**Program:**

A program is the overall plan of auditing of a specific PC. A program is the sequence of actions session by session to be undertaken on a case by the C/S in his directions to the auditor or auditors, auditing the case.

**Psycho-somatic:**

"Psycho", of course, refers to mind and "somatic" refers to body; the term psychosomatic means the mind making the body ill or illnesses which have been created physically within the body by derangement of the mind.

**Quad Flows: (Quads):**

(Four Flows) To run a process Quad Flows means, the four flows--another to self, self to another, another to another, and self to self --are run on a PC by an auditor.

**Q and A: (Q&A):**

Stands for Question and Answer. A failure to complete a cycle of action; to fail to complete a cycle of action; to deviate from an intended course of action; questioning the PC's answer; in auditing, it's a failure to complete a cycle of action on a PC.

**Quickie:**

Means omitting actions, for whatever reason, that would satisfy all demands or requirements and instead doing something superficially and accomplish less than could be achieved.

**Reactive Mind:**

The portion of the mind which works on a stimulus-response basis (given a certain stimulus it will automatically give a certain response) which is not under a person's volitional control and which exerts force and power over a person's awareness, purposes, thoughts, body and actions. The Reactive Mind never stops operating. Pictures of the environment, of a very low order, are taken (recorded) by this mind even in some states of unconsciousness.

**Read:**

The action of the needle on the Meter dial falling (moving to the right); SF, F, LF, LFBD are reads.

**Reality:**

Has to do with agreement (or lack thereof). It is the agreed upon apparency of existence. A reality is any data that agrees with the person's perceptions, way of thinking and education. Reality is one of the components of understanding. Reality is what is.

**Recall:**

Present time remembering something that happened in the past. It is "not" re-experiencing it, reliving or re-running it. You are in present time, thinking of, remembering, putting your attention on something that happened in the past --all done from present time.

**Rehabilitation (Rehab):**

The restoration of some former ability or state of being or some more optimum condition.

**Release:**

A PC whose Reactive Mind or some major portion of it is keyed out and is not influencing him. In Ability Clearing processing there are five major Grades of Release. They are, from the lowest to the highest: Grade 0, Communications Release, Grade 1, Problems Release, Grade 2, Relief Release, Grade 3, Freedom Release, Grade 4, Ability Release. Beyond that other Grades have been developed: Grade V Power Release, Grade VA Power Plus Release, Grade VI Whole Track Release.

These additional Grades are unnecessary if PC goes Clear on Engram Clearing. Each is a distinct and definite step toward greater levels of awareness and ability. (See also Grade).

**Religion:**

1. The ritual of worship or regard about spiritual matters. 2. A study of wisdom. 3. The word religion itself can embrace sacred lore, wisdom, knowingness of gods and souls and spirits, and could be called, with very broad use of the word, a philosophy. We could say there is religious philosophy and there is religious practice.
2. Religious Philosophy, implies study of spiritual manifestations: research on the nature of the spirit and study on the relationship of the spirit to the body; exercises devoted to the rehabilitation of abilities in a spirit. Religious Practice, implies ritual, faith-in, doctrine based on a catechism and a creed.

**Repair:**

Patching up past auditing or recent life errors. This is done by prepared lists and other processes or completing an incomplete process.

**Repetitive Process:**

A process, where the same auditing question or command is given many times to the PC. The PC is finding new answers every time. The auditor will state the command as it has never been asked before in a new unit of time, but with no variation of words; he will acknowledge the PC's answer and handle the PC origins by understanding and acknowledging what the PC said. This type of process will permit the individual to examine his mind and environment thoroughly and sort out relative importance's.

**Restimulation:**

Condition in which part of the Bank has been "triggered" by something in the person's environment (a restimulator) causing some greater or lesser degree of reactive behavior or condition; doing something unknowingly, unwittingly and without any understanding of what one is doing.

**Review:**

When a PC is having difficulty of some sort that is not immediately resolving with the actions being done, he may be sent to Review, where his case folder is carefully checked over or "reviewed" and the necessary corrective actions then taken to resolve the difficulty.

**R-Factor:**

Reality factor; explanation, information, data, etc., given to a person in order to bring about sufficient understanding for him to be able to perform a specific action. It is usually very short, like a few sentences.

**Roller coaster:** 1. A case that betters and worsens. A roller-coaster is always connected to a suppressive person and will not get steady gains until the suppressive is found on the case or the basic suppressive person earlier. Because the case doesn't get well he or she is a potential trouble source to us, to others and to himself.  
2. Case gets better, gets worse, gets better, gets worse.

**Rudiments:**

First principles, steps, stages or conditions. The basic actions done at the beginning of a session to set up the PC for the major session action. The normal rudiments are ARC breaks (upsets), Present Time Problems (worries) and Withholds (something PC feels he shouldn't say) - they are explained under each heading.

**Rundown (R/D, RD):**

A series of specific auditing actions done on a case designed to produce a specific result.

**Scientologist**

1. one who betters the conditions of himself and the conditions of others by using Scn technology.
2. one who controls persons, environments and situations. A Scientologist operates with the boundaries of the *Auditor's Code* and the *Code of a Scientologist*.
3. one who understands life. His technical skill is devoted to the resolution of the problems of life.
4. A specialist in spiritual and human affairs.

**Secondary:**

A Secondary is a mental image picture of a moment of severe and shocking loss or threat of loss which contains misemotion such as anger, fear, grief, apathy or "deathfulness." It is a mental image picture recording of a time of severe mental stress. It may contain unconsciousness.

**Self-Determinism:**

The ability to regulate and take responsibility for one's own considerations and actions; motivation by the thetan rather than by the environment.

**Service Computation: or Service Facsimile:**

Serv Fac, a Ability Clearing Level 4 term. The service computation is that computation generated by the PC (not the Bank) to make self right and others wrong; to dominate or escape domination and enhance own survival and injure that of others.

**Session:**

- 1) A precise period of time during which an auditor audits or processes a PC. That's an auditing session.
- 2) In coaching it is a precise period during which the coach instructs the student in a specific drill using his coaching instructions and written materials to correct the student. That's a coaching session.

**Slow Assessment:**

means letting the pc itsa while assessing. This consists of rapid auditor action, very crisp to get something that moves the TA and then immediate shift into letting the pc itsa during which, "Be quiet!" The slowness is overall action. It takes hours and hours to do an old preclear assessment form this way but the TA flies.

**Stable Datum:**

Any body of knowledge, more particularly and exactly, is built from one datum. That is its stable datum. Invalidate it and the entire body of knowledge falls apart. A stable datum does not have to be the correct one. It is simply the one that keeps things from being in a confusion and on which others are aligned.

**Terminal:**

Anything that can receive, relay or send a communication (most common usage); also, anything with mass and meaning. "Terminal" means in our language "the end point of a communication line". It can be a person or a thing.

**Theta:**

Energy peculiar to life or a thetan which acts upon the material in the physical universe and animates it, mobilizes it and changes it; natural creative energy of a thetan which he can direct toward survival goals, especially when it manifests itself as high-toned constructive communications.

**Thetan:**

From THETA (life static), a word taken from the Greek symbol or letter: theta, traditional symbol for thought or spirit. The thetan is the individual himself--not the body or the mind. The thetan is the "I"; one doesn't have or own a thetan; one is a thetan.

**Time Track:**

1) The endless record complete with 55 perceptions of the PC's entire past; the consecutive record of mental image pictures which accumulates through the PC's life or lives. It is very exactly dated.  
2) The consecutive record of mental image pictures which accumulates through the PC's existence. The *Time Track* is a very accurate record of the PC's past, very accurately timed and very obedient to the auditor. If a motion picture film were 3D, had fifty-two perceptions and could fully react upon the observer, the *Time Track* could be called a motion picture film.

**Tone 40:**

Intention without reservation or limit; an execution of intention.

Tone scale: The basic tone scale is a scale of emotions, from apathy to enthusiasm. Different levels of the tone scale have other characteristics visible in behavior and as potential survival (see also Uptone).

**Touch Assist:**

An assist that brings the person's attention to injured or affected body areas. When attention is withdrawn from them, so is circulation, nerve flows and energy, which for one thing limits nutrition to the area, and for another limits the drainage of waste products. Some ancient healers attributed remarkable flows and qualities to the "laying on of hands." Probably the workable element in this was simply heightening awareness of the affected area and restoring the physical communication.

**Training Routines: ( TRs): Training drills:**

on Ability Clearing courses which train students to perfect their communication skills to the level needed by an auditor in session. The TRs take up and drill the component parts of communication. Good TRs are the 'Carrier wave' needed to make processes work. Specific auditor skills in communication and smooth session control are gained in doing the TRs.

**Two-way communication (TWC, 2WC, Two-way comm):**

Are the precise process of getting somebody to open up and give emotional or personal information about himself. It is not chatter. It is governed by the rules of auditing.

**Understanding:**

Composed of affinity, reality and communication. These three things are necessary to the understanding of anything. One has to have some affinity for it, it has to be real to him to some degree and he needs some communication with it before he can understand it. Greater understanding comes about by increasing any one of these three factors.

Upper Indoctrination TRs (Upper Indoc's): Purpose of these four training drills is to bring about in the student the willingness and ability to handle and control other people's bodies and to cheerfully confront another person while giving that person commands. Also to maintain a high level of control under any circumstances.

**Uptone:**

At a high level of survival or state of being, plotted on the tone scale. A person who is uptone, or high-toned, has a

greater ability to handle his facsimiles, to control his environment and has a greater degree of survival than someone who is downtone, or low-toned.

**Valence:**

Is the assumption at the reactive level by one individual of the characteristics of another individual. An individual may have a number of valences which he puts on and off as he might hats. Often these changes are so marked that an observant person can notice him dropping one valence and putting on another. The shift from valence to valence is usually completely outside the awareness and control of the individual doing so. In other cases an individual has one valence, not his own, in which he is thoroughly stuck.

**Whole Track:**

Time Track. The moment to moment record of a person's existence in this universe in picture and impression form.

**Withhold:**

An undisclosed harmful (contra-survival) act. After having committed an Overt, the person wants to keep it hidden or secret. So he/she withholds the Overt.

**Worksheet: (W/S: WS):**

The sheets on which the auditor writes a complete running record of the session from beginning to end, page after page, as the session goes along.

~oo00oo~

**Quote from  
L. Ron Hubbard**

*“No culture in the history of the world save the thoroughly deprived and expiring ones, have failed to affirm the existence of a Supreme Being.”*

*Science of Survival*
